

I am letting you know that my xm service is very important to me. This service I receive at a very low rate of under 10.00 per month provides traffic reports and weather reports that I use nightly as I travel daily on my job. This service has become invaluable to me and I find it hard to beleive that there is a problem with radio station broadcasters having a problem with someone paying for a service that is very useful and enjoyable on a daily basis. I also use the regular radio stations but feel I should have the choice to choose other means of not only quality radio but my choice of what I listen to. Please reject the national association broadcasters petition 04-160 and continue to let personal choices for entertainment and up to date news that is invaluable to some of us.
